Email: stas@lutmediasolutions.ca

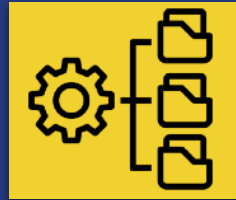

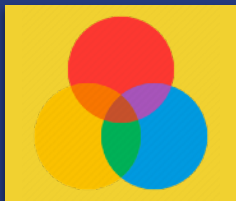

I am a ICG669 Digital Imaging Technician (DIT) living in BC, Canada with a background in Video Engineering.

With over eight years of experience in the position, my goal is to uphold the DoP's creative vision from Production to Post, and to aid the camera team with any technical issues.

DATA MANAGEMENT

I have a 100% perfect data management record with no media ever lost on my projects. My offloading kit has 10x fast SSD shuttle drives with all required software & hardware for data management & media recovery.

VIDEO VILLAGE BATTLESTATION

My video village cart has 2x 32" calibrated 4K OLED monitors and waveform / EL zone scopes for the DoP. No more squinting at the monitors, get the cinematic experience right on set with the large monitors.

I am able to live grade and display up to 5 camera signals and route everything to other monitors on set

MONITORS FOR ALL

I provide a Serv Pro Kit with a custom far reaching network. All crew members can stream the camera feed to their phones & tablets on set within a 6000 sqft area.

I am also able to provide a Producer / Hair & Make-up monitor cart with a 32" screen and comfortable work station.

REMOTE LOCATIONS

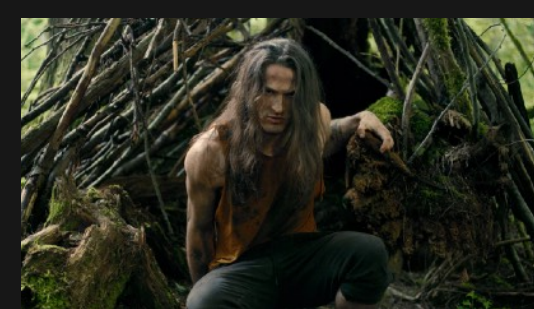

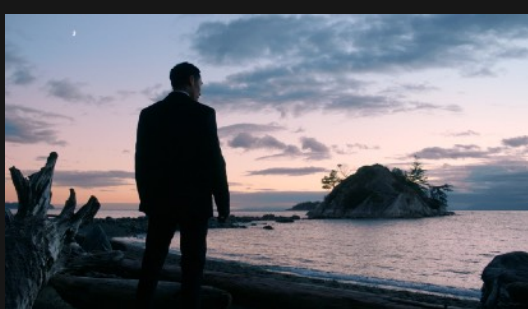

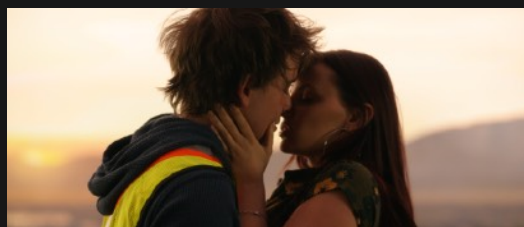

For those productions where locations are remote and cart access is difficult, I'm still able to provide DIT / Playback services with a small portable setup.

CAMERA CONTROL & PLAYBACK

I provide a remote camera control system, where most settings can be changed instantly right at video village. Need to see playback? My setup allows instantaneous playback on loop without disrupting the camera team.
